Ethiopian Shipping and Logistics Services Enterprise
Annual financial statements for the year ended 30 June 2024
Report of the management board

The management board submits its report together with the financial statements for the year ended 30 June 2024 to the Ethiopian Investment Holding(EIH).

Incorporation and address

Ethiopian Shipping and Logistics Services Enterprise, was established as an autonomous public enterprise on November 2011. The Enterprise is governed by the Public Enterprises Proclamation No. 25/1992.

The Enterprise has its head office at Legehar Building, Gambia Street Addis Ababa, Ethiopia and has branches and coordinating offices both in Ethiopia and abroad.

Principal activities

The Enterprise's principal activities are to render coastal and international marine and inland transport services; freight forwarding agency, multimodal transport, shipping agency and air agency services and to provide the services of stevedoring, shore-handling, dry port, warehousing and other logistics services for import and export goods.

Results

The Enterprise's results for the year ended 30 June 2024 are set out on page 11. The profit for the year has been transferred to state dividend payable account after deduction of legal reserve. The summarized results are presented below.

	30 June 2024	30 June 2023
	Birr'000	Birr'000
Revenue	55,907,347	43,313,115
Profit before tax	9,741,637	9,100,870
Tax (charge) / credit	(3,229,039)	(2,137,492)
Profit for the year	6,512,598	6,963,379
Other comprehensive income / (loss) net of taxes	16,969	82,104
Total comprehensive income for the year	6,529,566	7,045,483

Management board

Members of the management board who held office during the year and to the date of this report are set out on page 2.

H.E Ato Ahmed Shadie
Chairperson, Management Board

Ahmed Shide
Management Board
Chairman

Ethiopian Shipping and Logistics Services Enterprise
Annual financial statements for the year ended 30 June 2024
Statement of management board's responsibilities

In accordance with the Financial Reporting Proclamation No 847/2014, the Accounting and Auditing Board of Ethiopia (AABE) directed the Enterprise to prepare financial statements in accordance with International Financial Reporting Standards ("IFRS").

The Enterprise's management board is responsible for ensuring proper books of accounts are kept.

To enable the management board to meet this responsibility, the management board and executive management implement systems of internal control, accounting and information systems aimed at providing reasonable assurance that assets are safeguarded and the risk of error, fraud or loss is reduced in a cost-effective manner. These controls, contained in established policies and procedures, include the proper delegation of responsibilities and authorities within a clearly defined framework, effective accounting procedures and adequate segregation of duties.

Nothing has come to the attention of the management board to indicate that the Enterprise will not remain a going concern for at least twelve months from the date of this statement.

Signed on behalf of the management board by:

**Ahmed Shide
Management Board
Chairman**

H.E Ato Ahmed Shadie

**INDEPENDENT AUDITOR'S REPORT
TO THE SUPERVISING AUTHORITY OF
ETHIOPIAN SHIPPING AND LOGISTICS SERVICES ENTERPRISE**

Report on the Audit of the Financial Statements

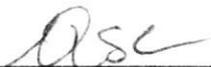

Qualified Opinion

We have audited the financial statements of Ethiopian Shipping and Logistics Services Enterprise, (the Enterprise), which comprise the statement of financial position as at 30 June 2024, and the statement of profit or loss and other comprehensive income, statement of change in equity and statement of cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, except for the effects of the matters described in the *Basis for qualified opinion* paragraph of our report, the accompanying financial statements present fairly, in all material respects, the financial position of the Enterprise as at 30 June 2024, and its financial performance and its cash flow for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for qualified Opinion

1. Trade and other receivable includes abnormal/credit balance of Birr 400,801,816. In consequence, we were unable to determine whether any adjustments might have been found necessary in respect of trade and other receivables.
2. The bank reconciliation of the Enterprise includes long outstanding reconciling items of cheques and deposits in transit more than Birr 81,906,195 and Birr 597,982,287 respectively as deductions and additions from the bank statement. There are also long outstanding balances as additions and deduction in the ledger balances for more than Birr 718,409,435 and Birr 113,238,954 respectively stated as collection not recorded and payment not recorded on the bank reconciliation. Furthermore Birr 8,900,416 and Birr 90,247,843 taken as an additions and deductions respectively from bank balances stated as error (void transactions recorded in subsequent period instead of current period).
3. Even though no overdraft facility is available for the Enterprise, there is a total credit balance of Birr 310,167,801 shown in bank balance understating the cash balance by the same amount in the statement of financial position. In consequence, we are unable to satisfy ourselves whether the account shown is correctly stated or not.

**INDEPENDENT AUDITOR'S REPORT
TO THE SUPERVISING AUTHORITY OF
ETHIOPIAN SHIPPING AND LOGISTICS SERVICES ENTERPRISE (continued)**

Report on the Audit of the Financial Statements (continued)

Basis for qualified Opinion (continued)

4. Trade and other payables included total long outstanding balances of Birr 2,345,863,352 for which we obtained no sufficient and appropriate explanation for the reason they had been not settled. Trade and other payables are included in the statement of financial position after deducting debit balances amounting total Birr 586,784,356. In consequence, we were unable to determine whether any adjustments might have been found necessary in respect of trade and other payable.
5. There is net balance of Birr 269,536,000 and Birr 3,336,000 stated as investment at foreign operation and inter-sectorial account under assets and liability respectively which should have been nil out during combination.
6. At the time of transferring net asset of the Ethio-Ferries formerly Tana Haik Transport Enterprise to Ethiopian Shipping and Logistics Services Enterprise no business valuation was conducted to get the fair value of the assets. In addition, the net asset of Tana Haik Transport Enterprise as per the audited financial statement as at the date of transfer is Birr 318,600,000, but only Birr 299,547,441 is accounted in the books of Ethiopian Shipping and Logistics Services Enterprise. In consequence, we are unable to satisfy ourselves whether the account shown is correctly stated or not.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Enterprise in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants (IESBA Code)* together with the ethical requirements that are relevant to our audit of the financial statements in Ethiopia, and we have fulfilled our other ethical responsibilities in accordance with those requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Asc

**INDEPENDENT AUDITOR'S REPORT
TO THE SUPERVISING AUTHORITY OF
ETHIOPIAN SHIPPING AND LOGISTICS SERVICES ENTERPRISE (continued)**

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

a) Revenue recognition

Recognition of the Enterprise's revenue is complex due to the significant volume of transactions and the extent of revenue stream within the Enterprise. Furthermore, revenue is always regarded as one of the key performance indicators which could create incentive for revenue to be recognized before services are rendered, resulting in significant risk associated with revenue from audit perspectives. Due to these factors the recognition of revenue is considered to be key audit matter.

Our audit procedures to address the risk of material misstatement relating to revenue recognition included an understanding of key controls management has in place to ensure that revenue is recognized in the appropriate period and in line with the terms and conditions of the relevant agreements; testing the operating effectiveness of key controls; analytical review procedures and cut off tests on the revenue recognized; obtaining explanation from management on major variations noted; and checking a sample of recorded revenue transactions against relevant source records. Our testing did not identify weaknesses in the design and operation of controls that would have required us to expand the nature or scope of our planned detailed test work and we did not identify significant errors in the recognition and measurement of revenue.

b) Djibouti exchange rate

Exchange rate used for Djibouti sector is closing rate for all transactions. There is a risk that financial statement may not reflect the correct picture.

We have checked compliance with IFRS, as to measurement and disclosure requirements, in detail; we also checked how crucial transactions and events have taken place. We verified the transactions, supporting documents and events are accurately reflected and properly recorded in the correct accounting period. We verified the classifications in the accounts and the disclosures.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with IFRSs and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

ase

**INDEPENDENT AUDITOR'S REPORT
TO THE SUPERVISING AUTHORITY OF
ETHIOPIAN SHIPPING AND LOGISTICS SERVICES ENTERPRISE (continued)**

Report on the Audit of the Financial Statements (continued)

Responsibilities of Management and Those Charged with Governance for the Financial Statements (continued)

In preparing the financial statements, management is responsible for assessing the Enterprise's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Enterprise or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Enterprise's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Enterprise's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Enterprise's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the

**INDEPENDENT AUDITOR'S REPORT
TO THE SUPERVISING AUTHORITY OF
ETHIOPIAN SHIPPING AND LOGISTICS SERVICES ENTERPRISE (continued)**

Report on the Audit of the Financial Statements (continued)

Auditors' Responsibilities for the Audit of the Financial Statements (continued)

financial statements or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Enterprise to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Woizero Alganesh Araya.

Other Information

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the Management board and executive management, the Report of the Management Board and the Statement of Management Board's Responsibilities, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Other Matters

Following the identification of discrepancies in the bank reconciliation process management has taken action to address the issues by entering a cash account reconciliation service contract with a service provider on the 20 March 2025. These actions include a detailed review and improved reconciliation procedures to reflect cash and cash equivalents accurately in next year's financial statements. Management believes these will strengthen the accuracy and reliability of the future reconciliations. We have nothing to report in this regard.

Net cash (outflow)/inflow from financing activities		(1,695,859)	(1,919,842)
Net increase/(decrease) in cash and cash equivalents		8,180,258	4,881,897
Cash and cash equivalents at the beginning of the year	19	29,508,830	23,664,424
Cash balance from Ethio-ferries		-	13,080
Effects of exchange rate changes on cash and cash equivalents	10	319,633	949,429
Cash and cash equivalents at the end of the year	19	38,008,720	29,508,830

The notes on pages 15 to 58 are an integral part of these financial statements.

Ethiopian Shipping and Logistics Services Enterprise
IFRS financial statements
Notes to the financial statements

1 General information

Ethiopian Shipping and Logistics Services Enterprise ("Enterprise") was established as an autonomous public enterprise on November 2011. The Enterprise is governed by the Public Enterprises Proclamation No. 25/1992. The Enterprise registered office is at :
Ras Mekonen Avenue
Addis Ababa,
Ethiopia

The Enterprise's principal activities are to render coastal and international marine and inland transport services; freight forwarding agency, multimodal transport, shipping agency and air agency services and to provide the services of stevedoring, shore-handling, dry port, warehousing and other logistics services for import and export goods.

2 Material accounting policies

2.1 Introduction to material accounting policies

The material accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.2 Basis of preparation

The financial statements for the period ended 30 June 2024 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and the notes to the financial statements.

For those assets and liabilities measured at fair value, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When measuring the fair value of an asset or a liability, the Enterprise uses market observable data as far as possible. If the fair value of an asset or a liability is not directly observable, it is estimated by the Enterprise using valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs (e.g. by use of the market comparable approach that reflects recent transaction prices for similar items or discounted cash flow analysis). Inputs used are consistent with the characteristics of the asset / liability that market participants would take into account.

The financial statements are presented in Ethiopian Birr. All values are rounded to the nearest thousand.

The preparation of financial statements in accordance with IFRS requires the use of certain critical accounting judgements, estimates and assumptions.

Changes in judgements, estimates and assumptions may have a material impact on the financial statements in the period the judgements, estimates and assumptions are changed. The areas involving a higher degree of judgment or areas where assumptions and estimates are material to the financial statements, are disclosed in Note 3.

2.3 Going concern

The financial statements have been prepared on a going concern basis. The management have no doubt that the Enterprise would remain in existence after 12 months from date of these financial statements.

2.4 Changes in accounting policies and disclosures

i) New Standards, amendments, interpretations not yet effective but earlier adopted by the Enterprise

There are no new standards and amendments to standards and interpretations that are not mandatory for the period ending 30 June 2024 and have been early adopted by the Enterprise.

ii) New Standards, amendments, interpretations not yet effective and not early adopted by the Enterprise

IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information

IFRS S1 sets out overall requirements for sustainability-related financial disclosures with the objective to require an entity to disclose information about its sustainability-related risks and opportunities that is useful to primary users of general purpose financial reports in making decisions relating to providing resources to the entity. Management of the Enterprise expects minimal effects upon implementation of this requirement. Applicable to annual reporting periods beginning on or after 1 January 2024. The Enterprise has opted not to adopt early. No significant impact is expected.

IFRS S2 Climate-related Disclosures

IFRS S2 sets out the requirements for identifying, measuring and disclosing information about climate-related risks and opportunities that is useful to primary users of general purpose financial reports in making decisions relating to providing resources to the entity. Management of the Enterprise expects minimal effects upon implementation of this requirement. Applicable to annual reporting periods beginning on or after 1 January 2024. The Enterprise shall apply the amendment when due. The amendments are not expected to have an impact on the Enterprise's financial statements.

Amendments to the SASB standards to enhance their international applicability

The amendments remove and replace jurisdiction-specific references and definitions in the SASB standards, without substantially altering industries, topics or metrics. Effective for annual reporting periods beginning on or after 1 January 2025. The impact of implementation of this requirement is not yet established or Management could not reasonably estimate its effect as at reporting date. The Enterprise will apply the amendment when due.

Presentation and Disclosure in Financial Statements IFRS 18 (effective date 1 Jan -2027)

The objective of this standard is to set out requirements for the presentation and disclosure of information in general purpose financial statements (financial statements) to help ensure they provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses. It applies to all financial statements that are prepared and presented in accordance with International Financial Reporting Standards (IFRSs). Standards for recognizing, measuring, and disclosing specific transactions are addressed in other Standards and Interpretations. The impact of implementation of this standard is not yet established or Management could not reasonably estimate its effect as at reporting date. The Enterprise will apply the amendment when due.

2.5 Foreign currency translation

a) *Functional and Presentation Currency*

Items included in the financial statements are measured using the currency of the primary economic environment in which the Enterprise operates ('the Functional Currency'). The Functional Currency and Presentation Currency of the Enterprise is the Ethiopian Birr (Birr).

b) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than the Enterprise's functional currency are recognized in profit or loss within other (loss)/income. Monetary items denominated in foreign currency are translated using the closing rate as at the reporting date.

Changes in the fair value of monetary securities denominated in foreign currency are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in profit or loss, and other changes in carrying amount are recognized in other comprehensive income.

c) *Foreign operation*

These financial statements are presented in ETB, which is also the functional currency of the Ethiopian shipping and logistics Enterprise (ESLSE). In the Enterprise's financial statements, all assets, liabilities and transactions with a functional currency other than the ETB are translated into ETB upon consolidation. The functional currencies have remained unchanged during the reporting period. On consolidation, assets and liabilities of foreign operation have been translated into ETB at the closing rate at the reporting date. The balances and fair value adjustments arising on the recognition of a foreign branch have been treated as assets and liabilities of the foreign operation and translated into ETB at the closing rate. Income and expenses have been translated into ETB at the average rate over the reporting period. Exchange differences are charged or credited to other comprehensive income and recognized in the currency translation reserve in equity. On disposal of a foreign operation, the related cumulative translation differences recognized in equity are reclassified to profit or loss and are recognized as part of the gain or loss on disposal.

2.6 Recognition of revenue from contracts with customers

The Enterprise has determined that the disaggregation of revenue based on the criteria of type of services meets the disaggregation of revenue disclosure requirement of IFRS 15. It depicts how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. This is illustrated in note 6.

The Enterprise has the following revenue streams:

Performance obligations	Revenue recognition	Basis of recognition
Shipping sector Cargo freight services	Control of the good or service is transferred to the customer over time (i.e. a period which commences with the loading of the cargo and ends when the vessel has discharged its cargo.	Revenue recognized based on milestone completed at the reporting date.
Voyage charters	Voyage income arises from a voyage charter, which involves the hiring of a vessel and crew for a voyage between a load port and a discharge port. Control is transferred to the customer over time.	Revenue recognized based on milestone completed at the reporting date.

Ethiopian Shipping and Logistics Services Enterprise
IFRS financial statements
Notes to the financial statements

Freight and forwarding sector

Transit handling Control of the good or service is transferred to the customer at a point in time On delivery of service

Stevedoring income Control of the good or service is transferred to the customer at a point in time On delivery of service

Dry port sector

Dry port services Control of the good or service is transferred to the customer at a point in time On delivery of service

Inland transport sector

Transportation services Control of the good or service is transferred to the customer over time Revenue recognized based on milestone completed at the reporting date.

As permitted under IFRS 15, no disclosure of transaction price allocated to remaining performance obligations is necessary if either of the following conditions is met for revenue from contracts with customers recognized over time:

(a) The performance obligation is part of a contract that has an original expected duration of one year or less; or (b) Revenue is recognized based on the entity's right to invoice the customer in the amount that corresponds directly with the value of the entity's performance completed to date

The Enterprise has applied this practical expedient transaction as its contracts with customers are usually for less than a year (usually 3 months or less).

2.7 Interest and similar income and expense

For all the government bills measured at amortized cost interest income or expense is recorded using the Effective Interest rate (EIR), which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the Effective Interest Rate (EIR), but not future credit losses.

The carrying amount of the financial asset or financial liability is adjusted if the Enterprise revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original EIR and the change in carrying amount is recorded as 'Interest and similar income' for financial assets and Interest and similar expense for financial liabilities.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

2.8 Foreign exchange revaluation gains or losses

These are gains and losses arising on settlement and translation of monetary assets and liabilities denominated in foreign currencies at the functional currency's spot rate of exchange at the reporting date. This amount is recognized in the statement of profit or loss and it is further broken down into realized and unrealized portion.

Foreign exchange gains and losses are presented in profit or loss within 'finance costs'.

2.9 Financial instruments

Initial recognition

Financial instruments are recognized when, and only when, the Enterprise becomes party to the contractual provisions of the instrument. All financial assets are recognized initially using the trade date which is the date the Enterprise commits itself to the purchase or sale.

Classification

The Enterprise classifies its financial instruments into the following categories :

Financial assets that are held within a business model whose objective is to hold assets in order to collect contractual cash flows, and for which the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are classified and measured **at amortized cost**;

Financial assets that are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and for which the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are classified and measured **at fair value through other comprehensive income**.

All other financial assets are classified and measured at fair value through profit or loss, notwithstanding above the Enterprise may :

- a) On initial recognition of an equity investment that is not held for trading, irrevocably elect to classify and measure it **at fair value through other comprehensive income**
- b) On initial recognition of a debt instrument, irrevocably designate it as classified and measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

All other financial liabilities are classified and measured at amortized cost. Financial instruments held during the year were classified as follows:

- Demand and term deposits with banking institutions, trade and other receivables, and investments in government securities were classified as at amortized cost;
- Borrowings and trade and other liabilities were classified as at amortized cost.

Measurement

On initial recognition:

- i) Financial assets or financial liabilities classified as at fair value through profit or loss are measured at fair value.
- ii) Trade receivables are measured at their transaction price.
- iii) All other categories of financial assets and financial liabilities are measured at the fair value plus or minus transaction costs that are directly attributable to the acquisition or issue of the instrument

Subsequent measurement

Financial assets and financial liabilities after initial recognition are measured either at amortized cost, at fair value through other comprehensive income, or at fair value through profit or loss according to their classification.

Interest income, dividend income, and exchange gains and losses on monetary items are recognized in profit or loss.

Fair value is determined as set out in Note 2.2 . Amortized cost is the amount at which the financial asset or liability is measured on initial recognition minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance..

Impairment

The Enterprise recognizes a loss allowance for expected credit losses on debt instruments that are measured at amortized cost or at fair value through other comprehensive income. The loss allowance is measured at an amount equal to the lifetime expected credit losses for trade receivables and for financial instruments for which: (a) the credit risk has increased significantly since initial recognition; or (b) there is observable evidence of impairment (a credit-impaired financial asset). If, at the reporting date, the credit risk on a financial asset other than a trade receivable has not increased significantly since initial recognition, the loss allowance is measured for that financial instrument at an amount equal to 12-month expected credit losses. All changes in the loss allowance are recognized in profit or loss as impairment gains or losses.

Lifetime expected credit losses represent the expected credit losses that result from all possible default events over the expected life of a financial instrument. 12-month expected credit losses represent the portion of lifetime expected credit losses that result from default events on a financial asset that are possible within 12 months after the reporting date.

Expected credit losses are measured in a way that reflects an unbiased and probability-weighted amount determined by evaluating a range of possible outcomes, the time value of money, and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

For trade receivables, the Enterprise applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognized from initial recognition of the receivables, see Note 4.3 and Note 18 for further details.

Presentation

All financial assets are classified as non-current except those with maturities of less than 12 months from the statement of financial position date, those which management has the express intention of holding for less than 12 months from the statement of financial position date or those that are required to be sold to raise operating capital, in which case they are classified as current assets.

All financial liabilities are classified as non-current except those expected to be settled in the Enterprise's normal operating cycle, those payable or expected to be paid within 12 months of the statement of financial position date and those which the Enterprise does not have an unconditional right to defer settlement for at least 12 months after the statement of financial position date.

Derecognition / write off

Financial assets are derecognized when the rights to receive cash flows from the financial asset have expired, when the Enterprise has transferred substantially all risks and rewards of ownership, or when the Enterprise has no reasonable expectations of recovering the asset.

Financial liabilities are derecognized only when the obligation specified in the contract is discharged cancelled or expires. When a financial asset measured at fair value through other comprehensive income, other than an equity instrument, is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. For equity investments for which an irrevocable election has been made to present changes in fair value in other comprehensive income, such changes are not subsequently transferred to profit or loss.

Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

2.10 Property, plant and Equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the property, plant and equipment if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Enterprise recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognized in statement of profit or loss as incurred. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized.

Depreciation is calculated using the straight-line method to allocate their cost less their residual values over their estimated useful lives, as follows:

Asset class	Useful life (years)	Residual Value
Building	10 - 50	5%
Lifts	10	1%
Vessels:		
Body	25	5%
Engine	18	5%
Crane	10	5%
Generator	20	5%
Containers:		
Containers: 40" feet	10	50%
Containers: 20" feet	10	67%
Vehicle and heavy trucks	5 - 10	5%
Motor cycles	5	1%
Computer and related items	5	1%
Capitalized spare parts	5	5%
Furniture and Fitting		
Short Lived Asset (up to 5 years)	5	1%
Medium Lived Asset (up to 10 years)	10	1%
Long Lived Asset (up to 20 years)	20	1%
Office equipment	10	1%

The Enterprise defines Property, plant and equipment as tangible items that:

(a) are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and (b) are expected to be used during more than one period.

The Enterprise commences depreciation when the asset is available for use. Spare parts, standby equipment and servicing equipment are recognized as property, plant and equipment when they meet the definition of property, plant and equipment.

Capital work-in-progress is not depreciated as these assets are not yet available for use. They are disclosed as construction work in progress and depreciated upon completion or availability for use upon which they are reclassified to property, plant and equipment.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in statement of profit or loss when the asset is derecognized.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Property, plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

Property, plant and equipment acquired in exchange for non-monetary assets or a combination of monetary and non-monetary assets are measured at fair value of the new asset. If the fair value cannot be determined reliably, then the exchanged asset is measured at the carrying amount of the asset given up.

2.11 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in statement of profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic life. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortization period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortization expenses on intangible assets with finite lives is presented as a separate line item in the statement of profit or loss.

Software

Costs associated with maintaining software programs are recognized as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Enterprise are recognized as intangible assets when the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use
- management intends to complete the software and use or sell it
- there is an ability to use or sell the software
- it can be demonstrated how the software will generate probable future economic benefits
- adequate technical, financial and other resources to complete the development and to use or sell the software are
- the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalized as part of the software include employee costs and an appropriate portion of relevant overheads.

Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use.

Research expenditure and development expenditure that do not meet the criteria above are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

The Enterprise amortizes intangible assets with finite useful life using the straight-line method over a useful lives of 8 years.

2.12 Investment property

Property that is held for long-term rental yields or for capital appreciation or both, are classified as investment properties. Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the Enterprise and the cost can be reliably measured. This is usually when all risks are transferred.

Investment properties are measured initially at cost, including transaction costs. The Enterprise has opted to subsequently carry investment property at cost and disclose fair value. Fair value is based on comparative market prices, adjusted if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Enterprise uses alternative valuation methods, such as recent prices on less active markets or discounted cash flow projections. Valuations are performed as of the reporting date by professional valuers who hold recognized and relevant professional qualifications and have recent experience in the location and category of the investment property being valued. These valuations form the basis for the carrying amounts in the financial statements.

The fair value of investment property reflects, the near current market conditions.

The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from this future expenditure other than those a rational market participant would take into account when determining the value of the property.

Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Enterprise and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognized.

The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from this future expenditure other than those a rational market participant would take into account when determining the value of the property.

Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Enterprise and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognized."

Investment properties are derecognized when they have been disposed. Where the Enterprise disposes of a property at fair value in an arm's length transaction, the carrying value immediately prior to the sale is adjusted to the transaction price, and the adjustment is recorded in the statement of changes in net assets available for benefit.

2.13 Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount

The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.14 Leases

IFRS 16- sets out the principles for the recognition, measurement, presentation and disclosure of leases. The objective is to ensure that lessees and lessors provide relevant information in a manner that faithfully represents those transactions. The standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. The standard eliminates the classification of leases as either operating leases or finance leases and introduces a single lease accounting model that requires lessees to recognize assets and corresponding liabilities.

This standard requires the Enterprise to make a number of assumptions, estimations and judgments that includes: i. lease liabilities were determined based on the value of the remaining lease payments, discounted by an appropriate incremental borrowing rate.ii. term of each arrangement was based on the original lease term.iii. The discount rate used to determine lease liabilities was the Enterprise's incremental borrowing rate. It was calculated based on observable inputs.

At the commencement date, the Enterprise recognizes:

i) right-of-use assets using cost model, i.e. cost at initial recognition less accumulated depreciation (in line with IAS 16: Property, plant and Equipment) and accumulated impairment losses (in line with IAS 36: Impairment of Assets).ii) lease liability by increasing its carrying amount to reflect interest on the lease liability and by reducing its carrying amount to reflect lease payments made.

Interest incurred on lease liability will be recognized in the statement of profit and loss as a finance cost.

Determination of whether an arrangement is a lease, or contains a lease

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or whether the arrangement conveys a right to use the asset.

Enterprise as a lessor

When assets are leased out under a finance lease, the present value of the lease payments is recognized as a receivable. The difference between the gross receivable and the present value of the receivable is recognized as unearned finance income. Lease income is recognized over the term of the lease using the net investment method (before income tax expense), which reflects a constant periodic rate of return. Payments received under operating lease are charged to profit or loss on a straight line basis over the period of the lease.

2.15 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined by the weighted average method. The cost of inventories comprises purchase price and other incidental costs necessary to bring the inventory to its present location and condition. Net realizable value is the estimate of the selling price and other incidental costs.

Provisions for saleable inventories are made based on aged listing for items older than 360 days, damaged and unusable stocks.

2.16 Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, call deposits held with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value and bank overdrafts. Bank overdrafts are shown within current liabilities in the statement of financial position.

2.17 Employee benefits

Short term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the statement of financial position.

Post-employment

The Enterprise operates various post-employment schemes, including both defined benefit and defined contribution pension plans and post-employment medical plans. Refer to Note 23 for further details.

a) Defined benefit obligations

The liability or asset recognized in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets if any. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of zero-coupon government bond yield curves.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets if any. This cost is included in employee benefit expense in the statement of profit or loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service costs.

For defined contribution plans, the Enterprise pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Enterprise has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

The Enterprise provides severance pay, service gratuity and funeral assistance benefits as described below:

Severance pay

The Enterprise operates an unfunded severance pay plan for its employees who have served the Company for 5 years and above and are below the retirement age (i.e. has not met the requirement to access the pension fund). The final pay-out is determined by reference to current benefit's level (monthly salary) and number of years in service and is calculated as 1 month salary for the first year in employment plus 1/3 of monthly salary for each subsequent in employment to a maximum of 12 months final monthly salary.

Service gratuity

The Enterprise pays end of service gratuity/Service Compensation when an employee voluntarily resigns from the Enterprise after working for at least five years. This benefits is paid in accordance to as set out in Labour Proclamation No. 377/2003, as amended by the Labour (Amendment) Proclamation No. 494/2006. Management gives its retirees an equivalent of 3 months salary as at the time of retirement.

Funeral Assistance and Survivor Benefit

In the event of the death of the employee, the surviving family is entitled to any salary due the employee at time of death. Any income due to the deceased shall also be paid to the legal heir. In addition to the aforementioned funerary assistance, employees are eligible for any lump-sum cash of survivor benefit as per applicable Ethiopian law.

For defined contribution plans, the Enterprise pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Enterprise has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

b) Bonus plans

The Enterprise recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation such as annual performance bonus.

c) Termination benefits

Termination benefits are payable when employment is terminated by the Enterprise before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Enterprise recognizes termination benefits at the earlier of the following dates: (a) when the Enterprise can no longer withdraw the offer of those benefits; and (b) when the entity recognizes costs for a restructuring that is within the scope of IAS 37 and involves the payment of terminations benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

2.19 Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are derecognized from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other income or finance costs.

2.20 Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

2.21 Trade and other payables

These amounts represent liabilities for goods and services provided to the Enterprise prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

2.22 Provisions

Provisions for legal claims, service warranties and make good obligations are recognized when the Enterprise has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

2.23 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market between market participants at the measurement date under current market conditions.

When a price for an identical asset or liability is not observable, fair value is measured using another valuation technique that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

In estimating the fair value of an asset or a liability, the Enterprise takes into account the characteristics of the asset or liability that market participants would take into account when pricing the asset or liability at measurement date.

For financial instruments, where the fair value of the financial instrument differs from the transaction price, the difference is commonly referred to as day one profit or loss. Day one profit or loss is recognized in profit or loss immediately where the fair value of the financial instrument is either evidenced by comparison with other observable current market transactions in the same instrument, or is determined using valuation models with only observable market data as inputs.

Day one profit or loss is deferred where the fair value of the financial instrument is not able to be evidenced by comparison with other observable current market transactions in the same instrument, or determined using valuation models that utilize non-observable market data as inputs. The timing of the recognition of deferred day one profit or loss is determined individually depending on the nature of the instrument and availability of market observable inputs. It is either amortized over the life of the transaction, deferred until the instrument's fair value can be determined using market observable inputs, or realized through settlement.

Subsequent to initial recognition, fair value is measured based on quoted market prices or dealer price quotations for the assets and liabilities that are traded in active markets and where those quoted prices represent fair value at the measurement date.

If the market for an asset or liability is not active or the instrument is unlisted, the fair value is determined using other applicable valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analyses, pricing models and other valuation techniques commonly used by market participants.

Where discounted cash flow analyses are used, estimated future cash flows are based on management's best estimates and a market related discount rate at the reporting date for an asset or liability with similar terms and conditions.

If an asset or a liability measured at fair value has both a bid and an ask price, the price within the bid-ask spread that is most representative of fair value is used to measure fair value.

Fair value hierarchy

Financial instruments measured at fair value are measured using the following levels of fair value measurement hierarchy:

- Level 1: The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Enterprise is the current bid price. These instruments are included in level 1.
- Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.
- Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

2.24 Current and deferred income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for Ethiopia adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in Ethiopia, where the Enterprise operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

3 Critical accounting judgements and key sources of estimation uncertainty

The preparation of the Enterprise's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the Enterprise's disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these judgements, assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Enterprise's exposure to risks and uncertainties includes:

- Capital management
- Financial risk management and policies
- Sensitivity analyses disclosures.

In the process of applying the Enterprise's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

3.1 Revenue recognition - allocating the transaction price

The Enterprise enters into contracts with customers for the provision of shipping and logistics services. These services are normally sold individually but from time to time, these products are grouped together and sold to customers as a bundle at a discounted price.

Because such contracts include several performance obligations, the transaction price must be allocated to the performance obligations on a relative stand-alone selling price basis. Management estimates the stand-alone selling prices at contract inception based on observable prices of the good and or services likely to be provided and the goods and or services rendered in similar circumstances to similar customers.

If a discount is granted, it is allocated to both performance obligations based on their relative stand-alone selling prices.

3.2 Property, plant and equipment

The depreciation charge for property, plant and equipment is derived using estimates of its expected useful life and expected residual value, which are reviewed annually. Increasing an asset's expected life or residual value would result in a reduced depreciation charge in the consolidated statement of profit or loss.

Management determines the useful lives and residual values for assets when they are acquired, based on experience with similar assets and taking into account other relevant factors such as any expected changes in technology. The depreciation rates used are set out in Note 2.

3.3 Fair value measurement of financial instruments

The fair value of financial instruments is determined by using valuation techniques. The Enterprise uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the statement of financial position date.

3.4 Post-employment benefits

Management uses estimates when determining the Enterprise's liabilities and expenses arising for defined benefit pension schemes. Management is required to estimate the future rates of inflation, salary increases, discount rates and longevity of members, each of which may have a material impact on the defined benefit obligations that are recorded. Further details, including a sensitivity analysis, are included in Note 23 to the financial statements.

3.5 Impairment on financial assets

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Enterprise uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Enterprise's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Details of the key assumptions and inputs used are disclosed in Note 4 to the financial statements..

3.6 Income / deferred tax

Significant judgement is required in determining the Enterprise's provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Enterprise recognizes liabilities for anticipated taxes based on estimates of amount of taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

3.7 Provisions and contingent liabilities

Management exercises judgement in measuring and recognizing provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, mediation, arbitration or government regulation, as well as other contingent liabilities as disclosed under Note 22 to the financial statements. Judgement is necessary to assess the likelihood that a pending claim will succeed, or a liability will arise, and estimates are required to determine the possible range of any financial settlement. The inherent uncertainty of such matters means that actual losses may materially differ from estimates.

4 Financial risk management

4.1 Introduction

The Enterprise's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Enterprise's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on its financial performance. The Enterprise does not hedge any of its risk exposures.

Financial risk management is carried out by the finance department under policies approved by the Management Board. The board provides written principles for overall risk management, as well as written policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

The table below summarizes categories of financial instruments held by the Enterprise:

	30 June 2024	30 June 2023
	Birr'000	Birr'000
Financial assets		
Investment securities held at amortized cost	2,000	2,000
Trade receivables	28,499,595	18,020,376
Staff receivables	922,221	582,142
Contract assets	440,207	483,704
Deposits with financial institutions	38,094,812	29,581,014
	<u>67,958,836</u>	<u>48,669,236</u>
Financial liabilities		
Trade payables	1,562,066	1,500,205
Contract liabilities	461,144	462,074
Borrowings	0	-
	<u>2,023,210</u>	<u>1,962,279</u>

4.2 Market risk

(i) Foreign exchange risk

The Enterprise is exposed to foreign exchange risk arising from various currency exposures, primarily, with respect to the US dollar, Euro and Djibouti Franc (DJF). Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities.

The Enterprise does not actively manage foreign exchange risk arising from future commercial transactions and recognized assets and liabilities, the Enterprise usually gets authorization from Commercial Bank of Ethiopia (CBE) regarding foreign denominated transactions. Foreign exchange risk arises when future commercial transactions or recognized assets or liabilities are denominated in a currency that is not the entity's functional currency.

As at 30 June 2024, if the local currency had weakened/strengthened by 5% against the US dollar with all other variables held constant, the effect on post-tax profit and equity would have been Birr 7,165,643 (2023: Birr 7,165,643) higher/lower, mainly as a result of US dollar denominated notes payable cash and cash equivalents.

As at 30 June 2024, if the local currency had weakened/strengthened by 5% against the Euro with all other variables held constant, the effect on post-tax profit and equity would have been Birr 85,513 (2023: Birr 63,019) higher/lower, mainly as a result of Euro denominated trade cash and cash equivalents.

As at 30 June 2024, if the local currency had weakened/strengthened by 5% against the Djibouti Franc with all other variables held constant, the effect on post-tax profit and equity would have been Birr 2,853,273 (2023: Birr 2,102,729) higher/lower, mainly as a result of Djibouti Franc denominated cash and cash equivalents.

Ethiopian Shipping and Logistics Services Enterprise
IFRS financial statements
Notes to the financial statements

(ii) Price risk

The Enterprise does not hold investments or securities that would be subject to price risk. The Enterprise is exposed to commodity price risk covering fuel and lubricant. The effect changes in commodity prices are being managed by negotiating with suppliers and closely monitoring pricing strategies of the Enterprise's services.

(iii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will be affected by changes in market interest rates. The Enterprise's exposure to interest rate risk relates primarily to borrowings at variable rates. Fixed rate borrowings only give rise to interest rate risk if measured at fair value.

Sensitivity analysis

The sensitivity analysis for interest rate risk shows how changes in the fair value or future cash flows of a financial instrument will fluctuate because of changes in market rates at the reporting date.

The following table demonstrates the sensitivity of changes in LIBOR rate, with all other variables held constant.

		Effect on profit before tax	
		30 June 2024	30 June 2023
		Birr'000	Birr'000
Increase in interest rate	+5%	-	77,261
Decrease in interest rate	-5%	-	(77,261)

Sensitivity to changes in interest rates is normally only relevant to financial assets or financial liabilities bearing floating interest rates. However, sensitivity will also be relevant to fixed rate financial assets and financial liabilities which are remeasured to fair value. There Enterprise has no financial assets or liability measured at fair value at the reporting date.

4.3 Credit risk

Credit risk is the risk that a counterparty will default on its contractual obligations resulting in financial loss .

The Enterprise is exposed to credit risk in respect of

- payment of trade receivables as invoices fall due 30 days after being raised
- contractual cash flows of debt investments and other receivables carried at amortized cost .

While cash and cash equivalents and debt investments at amortized cost are also subject to the impairment requirements of IFRS 9, the identified impairment loss was immaterial.

The amount that best represents the Enterprise's maximum exposure to credit risk is made up as follows:

	Fully performing	Impaired - Over 365 days
	Birr'000	Birr'000
30 June 2024		
Investment securities held at amortized cost	2,000	-
Trade receivables	26,268,269	2,231,326
Other receivables	922,221	-
Contract assets	440,207	-
Deposits with financial institutions	38,094,812	-
	<u>65,727,510</u>	<u>2,231,326</u>
30 June 2023		
Investment securities held at amortized cost	2,000	-
Trade receivables	15,789,050	2,231,326
Staff receivables	582,142	-
Contract assets	483,704	-
Deposits with financial institutions	29,581,014	-
	<u>46,437,911</u>	<u>2,231,326</u>

No collateral is held for any of the above assets. Fully performing assets represents counter parties that are paying their dues as they fall due and are operating within their approved credit limits. The debt that is overdue has exceeded the approved credit limit however counter parties continue to pay and are trading normally. The debt that is impaired is fully provided for.

Credit risk is managed by the finance department, which is responsible for managing and analyzing credit risk for each new client before standard payment and delivery terms are offered. For all financial assets the following credit risk modelling applies:

The Enterprise considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations
- Significant changes in the expected performance and behaviour of the borrower, including changes in the payment status of borrowers in the group and changes in the operating results of the borrower

The Enterprise does not grade the credit quality of receivables. The utilization of credit limits is in place and regularly monitored.

Macroeconomic information (such as market interest rates or growth rates) is incorporated as part of the internal rating model. Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 30 days past due in making a contractual payment. A default on a financial asset is when the counterparty fails to make contractual payments within 60 days of when they fall due.

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the company. The Enterprise categorizes receivables for write off when a debtor fails to make contractual payments greater than 360 days past due. Where receivables have been written off, the company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognized in statement of profit or loss.

(i) Trade receivables and unbilled receivables

The Enterprise applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables and unbilled receivables. To measure the expected credit losses, trade receivables and unbilled receivables have been grouped based on shared credit risk characteristics and the days past due. The unbilled receivables relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Enterprise has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before 30 June 2023 and 30 June 2024 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Enterprise has identified the GDP and the unemployment rate to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

On that basis, the loss allowance was determined as follows for both trade receivables and contract assets:

	Past due but not impaired	Impaired (Over 360 days)
30 June 2024		
Expected loss rates (%) - contract assets	20.25%	0.00%
Expected loss rates (%) - trade receivables	4.88%	100%
Gross carrying amounts (Birr '000) - contract assets	440,207	-
Gross carrying amounts (Birr '000) - trade receivables	28,499,595	2,231,326
Loss allowance provision (Birr '000) - contract assets	440,207	-
Loss allowance provision (Birr '000) - trade receivables	1,389,962	2,231,326
	<u>1,830,169</u>	<u>2,231,326</u>
30 June 2023		
Expected loss rates (%) - contract assets	20.25%	0.00%
Expected loss rates (%) - trade receivables	4.88%	100%
Gross carrying amounts (Birr '000) - contract assets	236,298	-
Gross carrying amounts (Birr '000) - trade receivables	4,642,116	2,231,326
Loss allowance provision (Birr '000) - contract assets	483,704	-
Loss allowance provision (Birr '000) - trade receivables	18,020,376	2,231,326
	<u>18,504,080</u>	<u>2,231,326</u>

Ethiopian Shipping and Logistics Services Enterprise
IFRS financial statements
Notes to the financial statements

The loss allowance provision for trade receivables and contract assets reconciles to the opening loss allowance for that provision as follows:

	30 June 2024	30 June 2023
	Birr'000	Birr'000
At start of year	(8,501,803)	(7,559,023)
Increase in credit losses in the year	(2,135,580)	(942,780)
	<u>(10,637,383)</u>	<u>(8,501,803)</u>

Trade receivables and contract assets are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the group, and a failure to make contractual payments for a period of greater than 360 days past due. Impairment losses on trade receivables and unbilled receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

During the period, the company made no write-offs of trade receivables, it does not expect to receive future cash flows from and no recoveries from collection of cash flows previously written off.

(ii) Debt investments at amortized cost

Debt investments at amortized cost comprises of investment in government bonds and treasury bills. All of the Enterprise's debt investments at amortized cost are considered to have low credit risk, and the loss allowance recognized during the period was therefore limited to 12 months expected losses.

Management considers the investments to be low credit risk since they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term. The loss allowance provision for investments at amortized cost reconciles to the opening loss allowance for that provision as follows:

	30 June 2024	30 June 2023
	Birr'000	Birr'000
At start of year	-	(2,811)
Decrease in credit losses in the year	-	2,811
At the end of the year	<u>-</u>	<u>-</u>

All of these financial assets are considered to be low risk, and thus the impairment provision recognized during the period was limited to 12 months expected losses.

(iii) Deposits with financial institutions

This comprise bank balances with local financial institutions and Commercial Bank of Ethiopia. Management considers the investments to be low credit risk since they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term. The loss allowance provision for deposits with financial institutions reconciles to the opening loss allowance for that provision as follows:

	30 June 2024	30 June 2023
	Birr'000	Birr'000
At start of year	(74,000)	(28,126)
Decrease / (increase) in credit losses in the year	(15,923)	(45,874)
At the end of the year	<u>(89,923)</u>	<u>(74,000)</u>

Impairment losses on financial assets is summarized below :

		30 June 2024	30 June 2023
	Note	Birr'000	Birr'000
Impairment losses on trade and contract assets	18	(2,135,580)	(942,780)
Impairment reversals on debt investments	16	-	2,811
Impairment (losses) / reversals on deposits with financial institutions	19	(15,923)	-
Total loss allowance under		<u>(2,151,502)</u>	<u>(939,969)</u>

4.4 Liquidity risk

Liquidity risk is the risk that the Enterprise will not be able to meet its financial obligations as they fall due. Prudent liquidity risk management includes maintaining sufficient cash balances, and the availability of funding.

Management performs cash flow forecasting and monitors rolling forecasts of the Enterprise's liquidity requirements to ensure it has sufficient cash to meet its operational needs so that the Enterprise does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. The Enterprise's approach when managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, without incurring unacceptable losses or risking damage to the Enterprise's reputation.

The table below analyses the Enterprise's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date.

The amounts disclosed in the table below are the contractual undiscounted cash flows.

	Less than 1 year	Between 1 and 5 years	Over 5 years	Total contractual cashflows	Carrying amount
	Birr'000	Birr'000	Birr'000	Birr'000	Birr'000
At 30 June 2024:					
Trade payables	1,562,066	-	-	1,562,066	36,911
Contract liabilities	461,144	-	-	461,144	49,414
Borrowings	0	-	-	0	0
	<u>2,023,210</u>	<u>-</u>	<u>-</u>	<u>2,023,210</u>	<u>86,325</u>
At 30 June 2023:					
Trade payables	1,039,005	-	-	1,039,005	36,911
Contract liabilities	474,134	-	-	474,134	49,414
Borrowings	662,076	-	-	662,076	-
	<u>2,175,214</u>	<u>-</u>	<u>-</u>	<u>2,175,214</u>	<u>86,325</u>

4.5 Capital management

The Enterprise's objectives when managing capital are to safeguard the Enterprise's ability to continue as a going concern in order to optimize returns and to maintain an optimal capital structure to reduce the cost of capital. The gearing ratios at 30 June 2024 and 30 June 2023 were as follows:

	30 June 2024 Birr'000	30 June 2023 Birr'000
Debt (Note 20)	0	-
Less: cash and cash equivalents (Note 19)	(38,008,720)	(29,508,830)
Net debt (i)	<u>(38,008,720)</u>	<u>(29,508,830)</u>
Equity (ii)	24,119,996	23,895,160
Net debt to equity ratio	-	-

(i) Debt is defined as borrowings as detailed in note 20

(ii) Equity comprises of capital, retained earnings, legal reserve, revaluation reserve and other reserves.

5 Operating segments

Segment information is presented in respect of the Enterprise's business segments which represents the primary segment reporting format and is based on the Enterprise's management and reporting structure.

Revenue in these segments is derived primarily from rendering unimodal and multimodal coastal, international marine and inland transport and cargo handling services. The Enterprise incurs expenses on an individual sector basis. Shared expenses are settled by the contracting sector and apportioned based on nature of services and other expense specific factors.

Basis for segmentation

The Enterprise's performance is reviewed by the management committee on a monthly basis. The committee comprises of the Enterprise's chief executive officer, sector directors and head of divisions. The committee examines performance based on the Enterprise's service offering and has identified eight reportable segments of its business:

i) Shipping services:

This sector provides multimodal services from port of loading to port of destination. This includes sea freight charge and port clearance at Djibouti.

ii) Freight forwarding services:

This sector is unimodal operator providing port clearance services and cargo handling (stevedoring) at port of Djibouti.

iii) Dry port services:

This sector provides cargo handling services at inland branch terminal sites

iv) Kality branch services:

This sector is unimodal operator providing inland transport services.

V) Corporate sector:

Corporate service sector is a sector that leads the enterprise's various support tasks and activities in structured manner.

VI) Maritime sector:

Maritime sector is a sector that is established to run human resources development and training center in the fields of maritime profession.

Vii) Foreign branch(Djibouti):

This sector is responsible for providing port clearance services and cargo handling at port of Djibouti.

Viii) Ethio-Ferries

This sector is engaged in water transport and related activities. Ethio-ferries formerly known as Bahirdar lake transport organization was handed over to Ethiopian Shipping and logistics service Enterprise starting from January 24,2023. Hence, the financial statements for the year ended on June 30,2024 contain financial performance of the sector from for year ending on June 30, 2024 with comparative information from January 24 to June 30,2023 financial performance and the financial position as at June 30,2023.

	<u>Birr'000</u>	<u>Birr'000</u>
6 Revenue from contracts with customers		
Cargo - Chartered vessel	1,868,646	1,412,402
Cargo - Own vessel	18,145,650	18,688,835
Multi- modal transportation	28,876,132	17,802,622
Transit handling	4,912,060	3,726,815
Training service	29,950	13,760
Boat transport	28,903	9,967
Dry port services	2,046,007	1,658,715
	<u>55,907,347</u>	<u>43,313,115</u>

The disaggregation of revenue with customers is as follows:

Shipping sector		
Voyage income	20,014,296	20,101,237
Clearance services	1,014,760	871,181
	<u>21,029,056</u>	<u>20,972,418</u>
Freight and forwarding sector		
Transit handling commission	586,929	460,958
Multi- modal transportation	28,876,132	17,802,622
Stevedoring income	-	-
	<u>29,463,061</u>	<u>18,263,580</u>
Dry port sector		
Dry port services	2,046,007	1,658,715
Babogaya Sector		
Training service	29,950	13,760
Ethio-Ferries		
Boat transport	28,903	9,967
Djibouti branch		
Transit handling	423,407	413,442
Inland transport sector		
Transportation of dry cargo	2,886,964	1,981,234
	<u>55,907,347</u>	<u>43,313,115</u>

The disaggregation of revenue based on timing is as below :

At a point in time:		
Transit handling commission	586,929	460,958
Stevedoring income	-	-
Boat transport	28,903	9,967
Dry port services	2,046,007	1,658,715
	<u>2,661,839</u>	<u>2,129,639</u>
Overtime:		
Voyage income	20,014,296	20,101,237
Multi- modal transportation	28,876,132	17,802,622
Clearance services	1,438,167	1,284,623
Training service	29,950	13,760
Transportation of dry cargo	2,886,964	1,981,234
	<u>53,245,509</u>	<u>41,183,476</u>
	<u>55,907,347</u>	<u>43,313,115</u>

Reconciliation of movement in contract assets and contract liabilities arising from revenue from contracts with customers is as below :

	30 June 2024	30 June 2023
	<u>Birr'000</u>	<u>Birr'000</u>
Contract assets		
Beginning	-	663,269
Recognized as revenue	(3,282,232)	(3,498,937)
Additions in the period	3,282,232	2,835,668
	<u>-</u>	<u>-</u>
Balance at the end of the year	<u>-</u>	<u>-</u>
Contract liabilities		
Beginning	462,074	464,734
Recognized as revenue	(29,294,306)	(18,287,223)

		1,000
		<u>5,498</u>

The Enterprise has obtained leasehold land under operating lease agreements in various location as detailed below:

Lease Description	Size in square meters	Date of Acquisition	Lease period in years
Babugaya	7,000	1st July 2003	30
Babugaya	3,327	1st April 2008	40
Dukem	196,600	1st July 2007	40
Kality	10,000	28th June 2007	50
Modjo	20,000	3rd August 2011	80

14 Investment property

The Enterprise owns investment properties in Moyale, Djibouti and Rotterdam held to earn rentals and/or for capital appreciation. The investment properties are accounted for using the cost model.

	30 June 2024	30 June 2023
	<u>Birr'000</u>	<u>Birr'000</u>
Balance as at the beginning of the year	1,439	7,488
Disposal during the year	-	(6,664)
Transferred from Ethio-ferries	-	648.06
Annual depreciation of investment properties	(102)	(34)
Balance at the end of the year	<u>1,337</u>	<u>1,439</u>

The fair value of investment property was determined by reference to the market prices of similar properties of the type and in the area in which the property is situated.

The table below analyses the non-financial assets carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

	Level 2	Level 3	Total
	Birr' 000	Birr' 000	Birr' 000
As at 30 June 2024			
Investment properties	1,337	-	1,337
As at 30 June 2023			
Investment properties	1,439	-	1,439

Valuation technique used to derive level 2 fair value on investment property has been valued on the basis of highest and best use that is Market Value for existing use. Leasehold considerations and tenancies have been reflected in the valuation.

	Birr'000	Birr'000
22(a) Provisions		
Provision for legal expense	38,353	22,108
Balance at the beginning of the year		
Balance at start of the year	22,108	7,037
Additional provision during the year		
Provision recognized (reversed) in the year	16,245	15,071
Balance at the end of the year	<u>38,353</u>	<u>22,108</u>

The Enterprise faces exposure to claims and other liabilities arising from third parties. These claims and other liabilities normally takes time to be determined and therefore significant judgement is required in assessing the likely outcome and the potential liability for such matters. Management in consultation with the legal and other advisers estimates a provision based on exposure, precedents and industry best practice. Specific provisions are made for estimated claims and other liabilities to the extent that the Enterprise considers it probable that there will be an outflow of economic benefits.

22(b) Contingent liabilities and contingent assets

Claims and litigation

The Enterprise is a party to numerous legal actions brought by different organizations and individuals arising from its normal business operations. The maximum exposure of the Enterprise to these legal cases as at 30 June 2024 is Birr 35,597,868 (30 June 2023: Birr 32,151,103).

Claims by the Enterprise

The Enterprise has instituted suits against third parties. The possible claim arising from settlement of these cases as at 30 June 2024 is Birr 804,280,684 (30 June 2023 : Birr 151,087,558)

	Remeasurements for:		
	- Severance pay	8,540	(10,136)
	- Service gratuity	21,712	(12,502)
	- Funeral Assistance and Survivor Benefit	23,162	(16,703)
		53,414	(39,342)
	Benefit payments		
	- Severance pay	(541)	(4,137)
	- Service gratuity	(1,040)	(887)
		(1,581)	(5,024)
	Net movements in defined benefit obligations		
	- Severance pay	22,123	1,556
	- Service gratuity	38,736	11,613
	- Funeral Assistance and Survivor Benefit	53,315	4,858
		114,175	18,027

The income statement charge included within personnel expenses includes current service cost, interest cost, past service costs on the defined benefit schemes.

Maturity analysis

Current	1,581	5,024
Non-Current	198,581	73,520
	200,162	78,544

The significant actuarial assumptions were as follows:

i)	<u>Financial Assumption Long term Average</u>		
	Discount Rate (p.a)	26.93%	27.67%
	Salary Increase Rate (p.a)	11.00%	10.00%

ii) Pre - retirement mortality

An A (67/70) mortality table was used. This is appropriate and we therefore used the same A (67/70) mortality table for the valuation at the current valuation date as per below :

Sampled ages	Mortality in service		Lives per 10,000 seagoing
	Lives per 10,000	Lives per 10,000	
20	8	10	
25	6	8	
30	6	7	
35	8	10	
40	14	17	
45	26	31	
50	47	57	
55	84	101	
60	144	173	

23 Defined benefit obligations (Contd)

iii) Withdrawal rate

The withdrawal rate was estimated using the active staff data by observing employees who left employment before retirement age, the population used for the calculation excluded new employees and employees above the age of 57.

	Withdrawal rates			
	Lower band	Upper band	2024	2023
0		19	2.99%	2.99%
20		24	3.99%	3.99%
25		29	3.70%	3.70%
30		34	3.97%	3.97%
35		39	4.06%	4.06%
40		44	4.23%	4.23%
45		49	2.84%	2.84%
50		54	4.29%	4.29%
55		57	8.79%	8.79%
58		60	0.00%	0.00%

Sensitivity Analysis

Paragraph 145 of IAS 19 requires an entity to disclose a sensitivity analysis for each significant actuarial assumption as at the end of the reporting period, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption at the valuation date.

A sensitivity analysis of the discount rate, salary increase rate and withdrawal rate were performed as at the current valuation date.

Severance Pay sensitivities

Major assumptions	1.5% decrease	Base amount	1.5% increase
Salary growth rate	47,519	47,676	47,835
Discount rate	48,021	47,676	47,344
Withdrawal rate	47,367	47,676	47,825

Funeral assistance and survivor benefit sensitivities

Major assumptions	1.5% decrease	Base amount	1.5% increase
Salary growth rate	82,399	83,200	84,015
Discount rate	84,161	83,200	83,190
Withdrawal rate	83,483	83,200	82,919

Gratuity sensitivities

Major assumptions	1.5% decrease	Base amount	1.5% increase
Salary growth rate	68,476	69,287	70,113
Discount rate	70,978	69,287	67,673
Withdrawal rate	69,335	69,287	69,238

24 Capital

The Enterprise is wholly owned by the Government of the Federal Republic of Ethiopia. The paid up capital was set at Birr 20 billion . The Enterprise is not limited by shares and hence has no par value.

As at reporting date, the Enterprise had achieved the authorized capital limit of Birr 20 billion, proclamation No. 25/1984 allows the Enterprise to hold the residual net profits as state dividend payable.

As Ethio-ferries(Formerly, Bahirdar lake transport organization) is merged with the Enterprise, the capital of Ethio-ferries is added to the Enterprise's capital though the capital has not yet increased officially.

25 Legal reserve

The legal reserve is a statutory reserve. The legal reserve is accumulated by transferring 5% of annual net profits to the reserve until it reaches a maximum of 20% of capital.

26 Other reserves

Other reserves relates to cumulative remeasurement gains or losses on actuarial assumptions applied in measurement of defined benefit liabilities, this is recognized within other comprehensive income. Besides, it encompasses foreign currency translation effects relating to foreign branch.

27 Revaluation reserve (IFRS Adoption remeasurement reserve)

Revaluation reserve includes first time IFRS adoption adjustments which were not distributable as dividends in compliance with guidance issued by Accounting and Auditing Board of Ethiopia dated 30th October 2019. However, AABE's Directive No_985/2024_Regarding Accounting for Asset revaluation surplus directs entities to recycle the surplus to retained earning based on amount of excess depreciation expense recognized for reporting period.

29 Related party transactions

Related parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operation decisions, or one other party controls both. A number of transactions were entered into with related parties in the normal course of business. The Enterprise's transactions with organizations under supervision of Ethiopian Investment Holding (EIH) and Key management personnel are identified as related party transactions. These are disclosed below:

29(a) Transactions and balances with related Companies

The outstanding balances that arose from the ordinary course of business with related companies are summarized as follows while details are shown below. The transaction with related parties are substantially on the same terms as for comparable transactions

31 **Events after reporting period**

In the opinion of the Management, except as below, there were no significant post balance sheet events which could have a material effect on the state of affairs of the Enterprise as at 30 June 2024 and on the profit for the period ended on that date, which have not been adequately provided for or disclosed.

On July 29, 2024, the National Bank of Ethiopia (NBE) issued Directive No. FXD/01/2024, which represents a significant reform of the foreign exchange regime in Ethiopia. This Directive introduces a market-based determination of the exchange rate and aims to address long-standing economic distortions. The effective date of this reform is immediate, and it includes several notable policy changes.

The announcement of the directive occurs after the reporting period but before the financial statements were authorized for issue, and it is considered as a non-adjusting event. The potential implications of this directive on the financial statements includes currency valuation that is a shift to a market-based exchange rate which could lead to volatility in the valuation of foreign currency positions and resulting in foreign exchange losses/gains.

This disclosure aims to inform users of the financial statements about significant changes in the economic environment post-reporting period and their potential impact on the Enterprise.
